

Dear Valued Patients,

We continue to feel grateful and honored to be your trusted physician and staff. During this trying and uncertain time, communication becomes ever more critical, with messages that are clear, accurate, and consistent.

We know it is a very difficult time for you and your families, so please know that your health and safety is paramount to all of us.

Our Care Center is part of a larger, cohesive medical practice known as Florida Woman Care (FWC). In collaboration with all the Care Centers across our market, we have created an easy to navigate, patient friendly site to provide you with helpful information, including:

- Prevention tips
- How to protect yourself and your loved ones
- Some answers to frequently asked questions
- Specific resources for pregnant or breastfeeding women
- Links to public sites, such as the Centers for Disease Control & Prevention, World Health Organization, and your State Health Department.

Click on the following link for Patient Resources: www.fwcpatients.com

Please reach out to your provider should you have any additional questions.

Stay safe and well!

Your Physician Team and Staff
