

Important update for gynecological concerns and complaints:

At Comprehensive Women's Health, we are committed to the continuity of your health care. We are introducing a new resource so that we can care for you from the comfort of your home. My Woman Care App allows audio and video appointments. All communications are in real-time, with a follow up in person recommended when appropriate. The following is a list of issues we can treat through telehealth:

1. Possible UTI
2. Irregular period
3. Vaginitis (pain, discharge and itching)
4. Birth Control care and refills if clinically appropriate
5. Review of results- labs, imaging, pathology
6. Breast concerns
7. Postoperative questions/care
8. Pelvic pain

Get the FREE app by downloading on your smartphone or laptop through the App Store. Once the app is downloaded and your appointment is confirmed, you will receive instructions as to next steps.
